PATENT ASSIGNMENT

PATENT ASSIGNMENT (this "Assignment") made as of March 2, 1999 by International Paper Company, a New York corporation ("IP"), to Formica Corporation, a Delaware corporation ("Formica"), pursuant to the Asset Purchase Agreement, dated as of March 2 1999, between IP and Formica (the "Agreement").

WHEREAS, capitalized terms used herein but not defined shall have the meanings ascribed to such terms in the Agreement;

WHEREAS, pursuant to the terms and subject to the conditions set forth in the Agreement, IP has agreed to sell, assign, transfer, convey, and deliver to Formica, and Formica has agreed to purchase, pay for, and accept from IP, all of IP's right, title, and interest in and to all of the goodwill arising exclusively from, and all other intangible assets of IP dedicated exclusively to, the operation of the business;

WHEREAS, IP is the owner of the entire right, title and interest in and to the patents as set forth in Schedule A (collectively, the "Patents") and the patent applications as set forth in Schedule A (collectively, the "Patent Applica-

232921.06-New York23A

tions"), used exclusively in the Business, and the respective inventions disclosed therein; and

WHEREAS, Formica is desirous of acquiring the entire right, title and interest in, to and under the Patents and Patent Applications and the respective inventions disclosed therein.

NOW, THEREFORE, for good and valuable consideration paid by Formica to IP pursuant to the Agreement at or before the execution and delivery hereof, the receipt and sufficiency of which is hereby acknowledged, IP does hereby sell, assign, transfer, convey and deliver to Formica, its successors and assigns, as of the Closing Date, its entire right, title and interest in, to and under the Patents, together with any and all reissues, reexaminations, modifications and extensions thereof, the Patent Applications, together with any and all continuing, divisional and reissue applications based thereon and any and all United States and foreign patents granted on said applications and all reissues, reexaminations, modifications and extensions thereof, which include the right to and full benefit of such priorities as may now or hereafter be granted by local law or treaty (including the International Convention for protection of industrial property) thereof, and all of the inventions relating to the foregoing, and hereby

authorizes and requests the Commissioner of Patents for the country involved to issue any and all patents on inventions resulting from the Patent Applications or other applications to Formica, or other entity designated by Formica, as assignee of the entire right, title and interest therein, all of the foregoing to be held and enjoyed by Formica, or other entity designated by Formica, as applicable, for its own use and for the use of its successors, assigns or other legal representatives, together with all of the income, royalties, damages and payments now or hereafter due or payable with respect thereto and all claims of IP for damages incurred or sustained by IP by reason of past, present and future infringement of the rights assigned under this Patent Assignment with the right to sue for and collect the same for Formica's own use and benefit, and for the use and benefit of Formica's successors, assigns and other legal representatives, as fully and entirely as the same would have been held and enjoyed by IP if this transfer to Formica had not been made.

IP hereby appoints and constitutes Formica as attorney-in-fact for IP with respect to the transfer of title of any of the Patents, Patent Applications and other patent rights and patent applications assigned pursuant to this Patent Assignment. Formica's authority hereunder shall in-

clude, without limitation, the authority to execute and receive any certificate of ownership or other document to transfer title to any Patent, Patent Application and other patent rights and patent applications assigned pursuant to this Patent Assignment, and to take any other actions necessary or incident to the powers granted to Formica in this Patent Assignment.

This Assignment shall inure to the benefit of Formica and its successors and assigns and shall be binding upon IP and its successors and assigns, effective immediately upon its delivery to Formica.

This Assignment will be governed by and construed in accordance with the laws of the State of New York. Each of Formica and IP irrevocably consents to the exclusive jurisdiction of the courts of the State of New York, or of any federal court located in such State, with respect to any claim, action, or proceeding between the parties arising out of or in connection with this Assignment.

This Assignment may be executed in one or more counterparts, each of which when so executed and delivered will be an original, but all of which will together constitute one and the same instrument.
